Summary of the activity of the Panta Rhei Working Groups – Year 2014

Title of the Working Group: Water Footprint of Cities

Report of the activity of the working group in 2014

We have organized 2 meetings, one during AGU 2014 and another one that occurred in August at Penn State University. Both meetings were attended by all the working group members.

We are currently getting ready to submit a publication that reviews the water footprint literature and tries to put this in the context of cities. The publication outlines ideas for research as well.

Description of the opportunities provided by Panta Rhei

It has provided an outlet for the working group members to come together, discuss priorities, and begin developing a joined vision. The initiative has also being useful in preparing grant proposals where Panta Rhei can be used as an example of a synergistic activity as well as to connect potential collaborators.

Suggestions for the future development of Panta Rhei

No suggestions at this point but finding funding has been challenging.
