## **Summary of the activity of the Panta Rhei Working Groups – Year 2014**

**Title of the Working Group: Large Sample Hydrology**

### **Report of the activity of the working group in 2014**

The main activity of the group in 2014 :

- Advertise the WG and make some contacts (mainly, Europe, USA, Latin america, Australia) ;
- Prepare a template for the design of the sample of watersheds, in order to help contributors to process the data sets ;
- Proposition of a session at EGU (finally, the session will be merged with to other sessions) ;

### **Description of the opportunities provided by Panta Rhei**

The opportunities provided by Panta Rhei are currently rather low, since the targeted sample of watersheds have not been constituted yet. However, once the first version of this sample will be ready, Panta Rhei will help us to advertise Large Sample Hydrology and share the data sets with other WG and scientists.

### **Suggestions for the future development of Panta Rhei**

Maybe a Panta Rhei session at EGU 2016/ AGU 2015 that would give the initiative a larger audience ?
